

## Wild About Rocks (5th Grade)

Students will walk the Discovery Loop trail to look for fascinating rocks that tell the story of Virginia's geological history. Take the Rock Hunt Challenge to find examples of igneous, metamorphic, and sedimentary rocks. Look in the stream bed and learn how rocks have moved over time. Observe the impact of weathering and erosion. Play a rock cycle game in the field. End with a picnic sitting on boulders under Wildrock's Wishing Willow.

This trip may include free play on Wildrock's Nature Playscape.

Virginia Standards of Learning  
Science: 5.1, 5.6, 5.7
